

Evergreen Theatre's Mini Residency

--- AKA: The fast and furious version of our week-long residency program ---

Looking for an affordable opportunity to creatively engage your students while exploring topical science & environmental issues?

Similar to our week-long residency program, this short but sweet version inspires students to...

- Discover meaning and relevance in curriculum linked science and environmental topics
- Think both critically and creatively while learning "outside the box"
- Challenge their environmental and social awareness
- Learn new drama skills and nourish their imagination, playfulness and self-expression
- Strengthen class teamwork and collaboration

What do you get?

- Script catered to your curriculum needs provided in advance
- Supporting documents to assist with prep work needed prior to "the big day"
- Trained professional Evergreen artist directing and finessing your scene
- Back drop, sound system and music/SFX, costumes and props

What Evergreen requires from participating teachers/school?

- A solid commitment to thoroughly prepping your students
- A promise to prioritize class time when our Evergreen artists are "in house"
- Guaranteed rehearsal space(s) large enough to accommodate all involved classes
- A fully dedicated "show space" for the entire day/s (ideally the gym)

What are your options?

- We offer 1-3 day programs (1 day=\$500/class, Add 2nd day +\$350, Add 3rd day +\$300)
- Programs created for single or multiple classes versus a whole school commitment
- Final performance presented to entire school, a handful of classes or simply recorded

DISCOVER THE FINE ART OF SCIENCE!
